

I was informed that the FCC has introduced a new broadcast service known as LPFM and that this might replace many local radio stations currently on air in my area. I listen to K-LOVE every day. It does exactly what it's slogan say; it's positive and encouraging to the community. It's wonderful music that really blesses me and I have spoken with many others that feel the same way. Many people are impacted by this station daily. To take it away would be detrimental to many people as individuals and the community as a whole. Please protect our favorite station and don't take it off the air, because if you do, many people will loose the thing that is most positive and encouraging for them in the day.
